

Advanced machining

Hittech Kemetech BV specialises in the fabrication of (precision) mechanical components, producing parts using CNC turning, CNC milling and welding.

Its often long-established and close cooperation with respected clients in the Benelux and Germany demonstrates the distinctive strength of Hittech Kemetech's 'fit for use' product supply system.

As part of Hittech Group BV, Hittech Kemetech is able to supply all mechanical components and (sub)modules as ready-to-use products. With guaranteed delivery times and very competitive price/quality ratios.

From repetitive manufacture to small and medium series.

Hittech Kemetech produces it.

Precision machining

In recent years, Hittech Kemetech has developed into an extremely reliable partner in the field of client-specific processes, specialising in high-grade CNC turning, CNC milling and welding.

Turning

With its wide range of CNC-driven lathes, Hittech Kemetech is able to produce small to medium series (50-250 units) from aluminium, steel and stainless steel.

Milling

Hittech Kemetech has an automated production cell with a 24 hour-a-day milling capacity. This production cell can automatically load and unload products and swap products during operation, allowing production to continue day and night.

The basic material is rectangular aluminium with dimensions of $\pm 50 \times 30 \times 10$ mm to $\pm 160 \times 120 \times 50$ mm.

Welding

Hittech Kemetech has also taken a leading position in the field of welding. Its strengths in this area concern specifically the joining of turned and/or milled products made of aluminium, steel or stainless steel. These welded products are finished at Hittech Kemetech's own workshop.

As part of Hittech Group BV, Hittech Kemetech has access to a wide range of manufacturing processes. Our extensive purchasing and outsourcing network makes us a one-stop shop for any mechanical component.

Besides the broad, processing options within the Hittech Group, Hittech Kemetech has also become an expert in the field of purchasing in Eastern Europe and Asia.

Hittech Kemetech core values:

- quality
- flexibility
- skill
- guaranteed delivery
